

Previous TOOLS for CC1 for Mac **version information**

V1.2.0

V1.1.1 to V1.2.0

- Now supports Macs with Intel processors.
- Added support for controlling MixKey remotely from CC1.
- Expanded MGX/URX remote control functionality.
- Solved some minor problems.

Control Center

V1.2.1 to V1.3.0

- Added support for updating the CC1 firmware to V1.0.1.

CC1 Firmware

V1.0.0 to V1.0.1

- Improved fader resolution.

V1.1.1

V1.1.0 to V1.1.1

Fixed the following issues.

- Control Center memory usage kept increasing.
- Cubase/Nuendo could crash when folder tracks were used while TOOLS for CC1 was installed.
- Nuendo Live could crash when TOOLS for CC1 was installed.
- If both TOOLS for CC1 and Yamaha Console Extension were installed, one of them would not function properly. (Either the CC1's remote control function would not work, or the integration

between the Yamaha digital mixer and the Steinberg DAW would not work.)

V1.1.0

Control Center

V1.1.0 to V1.2.0

- Added support for remote control of MGX/URX from CC1.
- Added the ability to select which profiles are assigned to CC1's profile selection buttons.
- Solved some minor problems.

V1.0.0

- First release version
